

ABSTRACT OF THE DISCLOSURE

This invention relates to compounds, which are generally anti-inflammatory and analgesic compounds, and which are represented by Formula I:

wherein A is a CH₂, CH(OH), C(O), C=NOR⁴, NR⁵, O, S, S(O), or S(O)₂, and the other substituents are as defined in the specification; or prodrugs, individual isomers, mixtures of isomers, and pharmaceutically acceptable salts thereof. The invention further relates to pharmaceutical compositions containing such compounds and methods for their use as therapeutic agents
